**Software Developer specializing in the React ecosystem.
React - React Native - GraphQL - Expo**

Objective: Looking to apply my skills to implement solutions to real world problems.

Work Experience as Contractor

- Software Engineer

M1neral - Houston, TX - January 2020 to May 2020

Description: Create components in the application based on given designs using React Hooks, GraphQL API, and Material UI. Implement MapBox expressions to filter out data from the map. Refactor components when needed and create reusable components to simplify development.

Technologies Used: JavaScript, Map Box, React (Hooks), React Router, Material Ui, Context, GraphQL, Node, Git, Azure and more.

- Web Developer

Meli Marketing - Katy, TX September 2019 to October 2019 **Description:** Maintain legacy websites.

Technologies Used: Html, Css, Javascript

- Front End / Mobile Engineer

I-Lu Technologies Inc - Remote - February 2019 to April 2019

Description: Maintain legacy front end code in Ruby on Rails and develop React applications. Using GitHub as a version control software, and use PR for code review. Using wireframes create React application and create routes, router and connect it to the ruby backend. Along side prototyping the React Native mobile App.

Technologies Used: JavaScript, es6, React, React Router, Axios (for api calls), Material Ui, Ruby on Rails, Node, Git, GitHub and more.

Other Work Experience

Shine Dark Music – 2014 to Present **Location:** Remote

Description: Use technology as a medium to promote, engage and create tools for the record label. Work with partners around the world for distribution and business.

Technologies Used: React, React Native, Firebase, ThreeJs, Node, Git, GitHub, Documentation, Expo SDK, Xcode, CocoaPods, App Store submission, Maintenance, Shopify Development , Graphic Design and more.

Website: www.shinedarkmusic.com

Apps: Noise Machine Sampler (App Store) , Remastered (App Store)
